About this Guide

Welcome to Ryerson University's *Now is the Time for Open Educational Resources*. This resource lists a broad range of open educational resources (OER), primarily open textbooks, organized by academic programs taught at Ryerson University. OER are teaching, learning, and research resources that, through permissions granted by the copyright holder, allow others to use, distribute, keep, or make changes to them.

Purpose

This guide was inspired by McMaster University's OER by Discipline guide and by BCcampus's OER by Discipline Directory. We are grateful to them for providing us with such wonderful examples to work from.

The version of the guide presented here was developed to highlight quality open textbooks and organize them so that Ryerson faculty can easily locate resources in their disciplines or subject areas. Although this is a good start, we are far from having a complete list and will be regularly updating this resource as we find additional, suitable materials to include. As this guide evolves, other OER – case studies, courses, games, simulations, videos, and more – may also be evaluated and added.

To locate materials, users may browse the contents or use the search box located in the top-right of each page in the online version to locate a specific subject.

We invite you to notify us if you discover a valuable OER within

or related to your discipline. Please complete the following form to make your contribution.

We hope that Ryerson faculty and instructors will find this guide helpful as they consider the options available for quality, open textbooks for their courses.

Attribution information is provided for each title. If there is any discrepancy between the license information in this book and the license on the actual title, the license on the book takes precedence.

Introduction

Open Educational Resources (OER) are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use and re-purposing by others. –The William and Flora Hewlett Foundation

OER present benefits to both learners and educators. They address inequities around affordability, access, learner retention and diversity and offer opportunities for creating, co-creating and re-mixing content to suit teaching and learning needs.

One of the barriers identified in faculty adoption and use of OER involves the time it takes to find suitable materials in their discipline¹Awareness and use of open educational resources (OER) in Ontario: A preliminary study of post-secondary educator perspectives [Research report].. This guide was developed to help alleviate this problem by creating a targeted OER list by discipline for Ryerson faculty and department use.

A project team, composed of members of the Ryerson Library and the Centre for Excellence in Learning and Teaching, found, evaluated and created this list of OER specifically geared to the Ryerson context. These OER primarily consist of peer-reviewed, open textbooks that are categorized and sorted by discipline. We are hoping that this guide will serve as a resource for faculty, and staff assisting faculty with their selection of course materials.

The guide will be revised as new resources become available.

1. eCampusOntario. (2018).

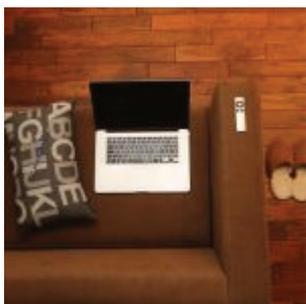

Comments and suggestions from all users are welcome and can be made using this feedback form.

REMOTE TEACHING

OER for Remote Teaching

Remote teaching: a practical guide with tools, tips, and techniques 🍁

By: Alison Flynn and Jeremy Kerr, University of Ottawa

This resource is designed to help you convert your face-to-face class to a remote course as simply as possible. We walk you through the process, at each step giving a suggestion for a specific tool/technology—the uOttawa-supported one and our preferred tool if it is different. We also give an example and sources of additional information. We also created a template of a course in Brightspace, syllabus, and other resources that you can modify to suit your own course, if desired.

ABC Online Course Design

By: The Centre for Excellence in Learning & Teaching, Ryerson University, and the Centre for Teaching and Learning, Western University

The goal of ABC Online Course Design is student-centred rapid course development. We are recommending this process for instructors looking to shift their course from in-person to online. This process is flexible enough to be used by:

- Individual instructors
- Instructor teams
- Departments or programs

To participate in ABC Online Course Design, you only need a course outline and a set of learning outcomes.

ABC Online Course Design consists of two components:

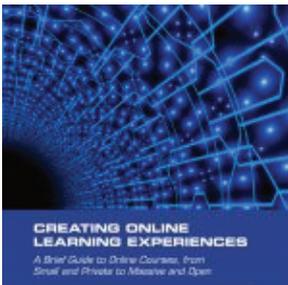

1. Pre-workshop activities, to be completed on your own (30-40 minutes)
2. A course storyboarding workshop, facilitated in Zoom (90 minutes)

If you'd prefer not to attend a workshop, or if one isn't available at a suitable time, it is also possible to complete ABC Online Course Design entirely on your own, by completing both "Part 1: Preworkshop Activities" and "Part 2: Independent Storyboarding" in your own time.

Attribution: "ABC Online Course Design" by Western University's Centre for Teaching and Learning and Ryerson University's Centre for Excellence in Teaching and Learning is an adaptation of the ABC Learning Design method by Clive Young and Natasa Perovic, UCL (2015) and Learning Types, Laurillard, D. (2012), and is made available through an Attribution-NonCommercial-ShareAlike 4.0 International License.

Creating Online Learning Experiences

Edited by: Matt Crosslin, et al., University of Texas at Arlington

This book provides an updated look at issues that comprise the online learning experience creation

process. As online learning evolves, the lines and distinctions between various classifications of courses has blurred and often vanished. Classic elements of instructional design remain relevant at the same time that newer concepts of learning experience are growing in importance. However, problematic issues new and old still have to be addressed. This handbook explores many of these topics for new and experienced designers alike, whether creating traditional online courses, open learning experiences, or anything in between.

Attribution: *Creating Online Learning Experiences* by Matt Crosslin is licensed under a Creative Commons Attribution-NonCommercial 4.0 International License, except where otherwise noted.

Remote Teaching: A Guide for Teaching

Assistants 

By: Meredith Allen, Alisha Szozda, Jeremy Kerr, and Alison Flynn, University of Ottawa

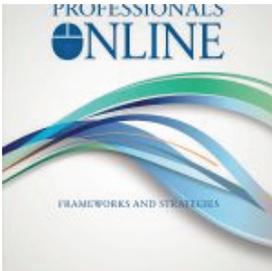

This guide is designed to help you effectively and confidently work as a teaching assistant in a remote teaching environment.

Attribution: *Remote teaching: a guide for teaching*

assistants by Meredith Allen, Alisha Szozda, Jeremy Kerr, and Alison Flynn is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Teaching Health Professionals Online

By: Sherri Melrose, Caroline Park, and Beth Perry, Athabasca University

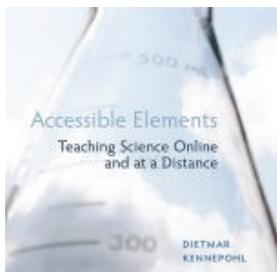

Teaching Health Professionals Online is a must-read for professionals in the health care field who strive to deliver excellence in their online classes. Intended for a wide range of professionals, including nurses, social workers, occupational and radiation therapists, chiropractors, dietitians, and dental hygienists, this compendium of teaching strategies will inspire both new and experienced instructors in the health professions. In addition to outlining creative, challenging activities with step-by-step directions and explanations of why they work, each chapter in the text situates practice within the context of contemporary educational theories such as instructional immediacy, invitational theory, constructivism, connectivism, transformative learning, and quantum learning theory.

Attribution: *Teaching Health Professionals Online* by Sherri Melrose, Caroline Park, and Beth Perry is licensed under a Creative Commons License (CC BY-NC-ND 2.5 CA).

Accessible Elements: Teaching Science Online and at a Distance

Edited by: Dietmar Kennepohl and Lawton Shaw, Athabasca University

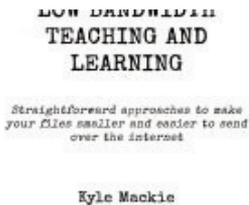

Accessible Elements informs science educators about current practices in online and distance education: distance-delivered methods for laboratory coursework, the requisite administrative and institutional aspects of online and distance teaching, and the relevant educational theory. Delivery of university-level courses through online and distance education is a method of providing equal access to students seeking post-secondary education. Distance delivery offers practical alternatives to traditional on-campus education for students limited by barriers such as classroom scheduling, physical location, finances, or job and family commitments. The growing recognition and acceptance of distance education, coupled with the rapidly increasing demand for accessibility and flexible delivery of courses, has made distance education a viable and popular option for many people to meet their science educational goals.

Attribution: *Accessible Elements: Teaching Science Online and at a Distance* by Dietmar Kennepohl and Lawton Shaw is licensed under a Creative Commons License (CC BY-NC-ND 2.5 CA).

Low Bandwidth Teaching and Learning

By: Kyle Mackie

Shifting to remote teaching and learning brings with it a number of considerations and challenges. If learners are able to connect to free/institutional networks (e.g., from local libraries, or on-campus student work areas), they will likely be able to access a safe, reliable, and robust internet connection. However, if these learners are relying on home-based connections, these will likely have a slower speed connection, and their service may be shared with others in their house (for work, or education, or entertainment). While we're considering activities that lower the bandwidth, it's also to have a refresher on how to optimize images, PDFs, etc. for effective distribution before you post them to your LMS or send them via email.

Attribution: *Low Bandwidth Teaching and Learning* by Kyle Mackie is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

FACULTY OF ARTS

Anthropology

Cultural Anthropology

Perspectives: An Open Invitation to Cultural Anthropology

Edited by: Nina Brown, Laura Tubelle de González, and Thomas McIlwraith

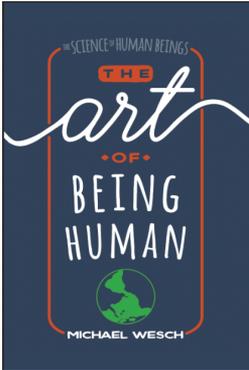

This anthropology textbook has been positively-reviewed by peers. It covers introductory concepts in cultural anthropology, from the development of anthropological ideas to the evolution of health and medicine.

Includes: section questions and glossary of terms.

Attribution: *Perspectives: An Open Invitation to Cultural Anthropology* edited by Edited by Nina Brown, Laura Tubelle de González, and Thomas McIlwraith is licensed under a Creative Commons Attribution Non-Commercial 4.0 International License.

The Art of Being Human: A Textbook for Cultural Anthropology

By: Michael Wesch, Kansas State University

This anthropology textbook has been positively-reviewed by peers. It covers introductory concepts in cultural anthropology, from the fieldwork to the evolution of the art of being human.

Includes: challenges to apply anthropological concepts to everyday life for expanded learning.

Attribution: *The Art of Being Human: A Textbook for Cultural Anthropology* by Michael Wesch is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Biological Anthropology

Biological Anthropology (Libre Texts)

By: Tori Saneda & Michelle Field

This text covers introductory biological anthropology concepts, including evolution theory, non-human primates, and human evolution.

Includes: examples.

Attribution: *Biological Anthropology (Libre Texts)* by Tori Saneda & Michelle Field is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 3.0 U.S. license.

Physical Anthropology

Physical Anthropology (Schoenberg)

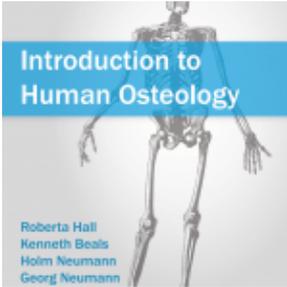

This anthropology text covers introductory concepts in physical anthropology, from anthropology and culture, social institutions, and globalization, modernization and development.

Includes: diagrams.

Attribution: *Physical Anthropology (Schoenberg)* is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 3.0 U.S. license.

Introduction to Human Osteology

By: Roberta Hall, Oregon State University, Kenneth Beals, Oregon State University, Holm Neumann, Georg Neumann, Indiana University, Gwyn Madden, Grand Valley State University

This anthropology text has been positively-reviewed. This text covers introductory human osteology concepts.

Includes: diagrams and glossary.

Attribution: *Introduction to Human Osteology* by Roberta Hall et al is licensed under a Creative Commons Attribution Non-Commercial 4.0 International License.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

Arts & Contemporary Studies

Write Here, Right Now: An Interactive Introduction to Academic Writing and Research

By: Aaron Tucker, Paul Chafe and others, Ryerson University

Write Here, Right Now: An Interactive Introduction to Academic Writing and Research is a writing e-textbook for first year university students that effectively integrates into the flipped classroom model.

Includes: Videos and activities

Attribution Statement: *Write Here, Right Now: An Interactive Introduction to Academic Writing and Research* by Aaron Tucker, Paul Chafe and others is licensed under a Creative Commons Attribution 4.0 International License.

Introduction to Logic and Critical Thinking

By: Matthew J. Van Cleave, Lansing Community College

This is an introductory textbook in logic and critical thinking, aimed at providing the reader with a set of tools and skills that will enable them to identify and evaluate arguments.

Includes: exercises.

Attribution: *Introduction to Logic and Critical Thinking* by Matthew J. Van Cleave is licensed under a Creative Commons Attribution 4.0 International License.

Introductory Statistics: OpenStax

By: Barbara Illowsky and Susan Dean, De Anza College

Introductory Statistics follows the scope and sequence of a one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it.

Includes: Practice activities and solutions

Attribution: *Introductory Statistics* by Barbara Illowsky and Susan Dean is licensed under a Creative Commons Attribution 4.0 International License.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

Related Disciplines

History

Communication & Culture

Media, Society, Culture and You

By: Mark Poepsel, Southern Illinois University, Edwardsville

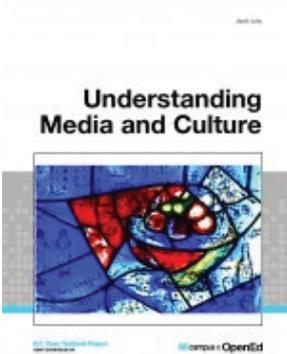

This communications studies text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in communications & multimedia, from social media to the fall of gaming.

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

Attribution: *Media, Society, Culture and You* by Mark Poepsel is licensed under a Creative Commons Attribution 4.0 International License. .

Understanding Media and Culture

By: Jack Lule, Lehigh University

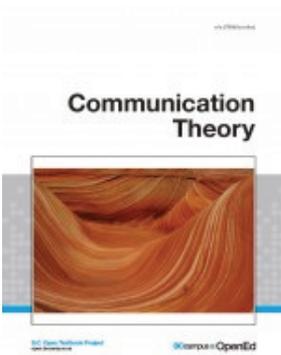

This media studies course is positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in media and culture, from the modernization to the violence in media.

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

Attribution: *Understanding Media and Culture* by Jack Lule is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Communication Theory

This communication studies text has been positively-reviewed and has been successfully adopted by other

faculty. It covers introductory concepts in communication theory, from reduction to the network society.

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

Attribution: *Communication Theory* is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

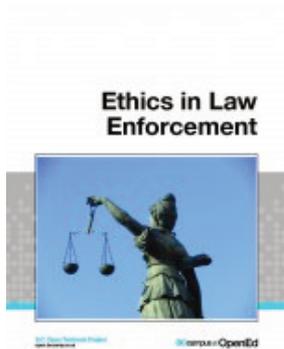

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

Criminology

Ethics in Law Enforcement

By: Steve McCartney, Justice Institute of British Columbia, Rick Parent, Simon Fraser University

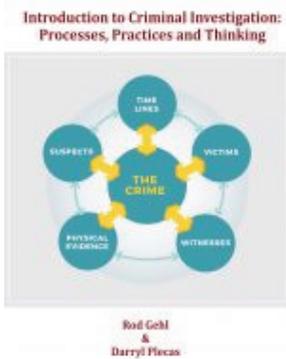

In this book, you will examine the moral and ethical issues that exist within law enforcement. This book will also familiarize you with the basic history, principles, and theories of ethics. These concepts will then be applied to the major components of the criminal justice system: policing, the courts, and corrections.

Attribution: *Ethics in Law Enforcement* by Steven McCartney and Rick Parent is licensed under a Creative Commons Attribution 4.0 International License.

Introduction to Criminal Investigation: Processes, Practices and Thinking

By: Rod Gehl, Justice Institute of British Columbia, Darryl Plecas, University of the Fraser Valley

Introduction to Criminal Investigation, Processes, Practices, and Thinking, as the title suggests, is a teaching text describing and segmenting criminal investigations into its component parts to illustrate the craft of criminal investigation.

Attribution: *Introduction to Criminal Investigation: Processes, Practices and Thinking* by Rod Gehl and Darryl Plecas is licensed under a Creative Commons Attribution Non-Commercial 4.0 International License.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

Economics

Economics (Openstax)

Senior Contributing Authors: Steven A. Greenlaw, University of Mary Washington and David Shapiro, Pennsylvania State University

This economics text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in economics, from elasticity to inflation.

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

Attribution: *Economics (Openstax)* is licensed under a Creative Commons Attribution 4.0 International License.

Macroeconomics

Principles of Macroeconomics (Lyryx)

By: Douglas Curtis, Trent University and Ian Irvine, Concordia University

Principles of Macroeconomics is an adaptation of the text, *Macroeconomics: Theory, Markets, and Policy* by D. Curtis and I. Irvine, and presents a complete and concise examination of introductory macroeconomics theory and policy suitable for a first introductory course.

Includes: instructor resources

Attribution: *Principles of Macroeconomics* by Douglas Curtis and Ian Irvine is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Microeconomics

Principles of Microeconomics 

By: Douglas Curtis, Trent University and Ian Irvine, Concordia University

Principles of Microeconomics is an adaptation of the text, *Microeconomics: Markets, Methods, and Models* by D. Curtis and I. Irvine, which provides concise yet complete coverage of introductory microeconomic theory, application and policy in a Canadian and global environment.

Includes: instructor resources

Attribution: *Principles of Microeconomics* by Douglas Curtis and Ian Irvine is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Business Statistics

Introductory Business Statistics (Openstax)

Senior Contributing Authors: Alexander Holmes, The University of Oklahoma, Barbara Illowsky, De Anza College and Susan Dean, De Anza College

This statistics text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in business statistics, from probability to confidence intervals.

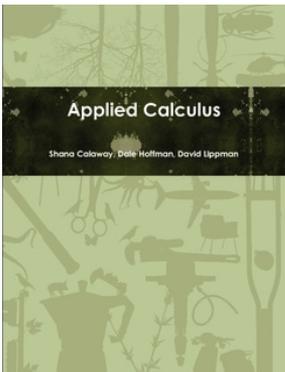

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

Attribution: *Introductory Business Statistics* is licensed under a Creative Commons Attribution 4.0 International License.

Calculus

Applied Calculus

By: Shana Calaway, Dale Hoffman, and David Lippman

This text covers all of the concepts of first-year calculus with a balance of application and theory.

Includes: problem-solving guides, examples, videos, applications, problems, selected solutions, and summaries.

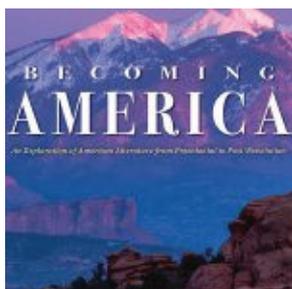

Attribution: *Applied Calculus* by Shana Calaway, Dale Hoffman, and David Lippman is licensed under a Creative Commons Attribution 4.0 International License.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

English

Becoming America: An Exploration of American Literature from Precolonial to Post-Revolution

Edited by: Wendy Kurant, University of North Georgia Press

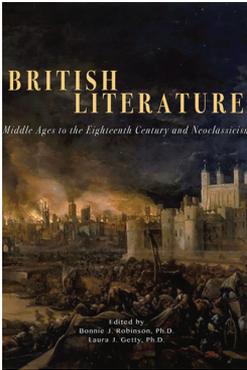

The University of North Georgia Press and Affordable Learning Georgia bring you *Becoming America: An Exploration of American Literature from Precolonial to Post-Revolution*. Featuring sixty-nine authors and full texts of their works, the selections in this open anthology represent the diverse voices in early American literature. This completely-open anthology will connect students to the conversation of literature that is embedded in American history and has helped shaped its culture.

Includes: Contextualizing introductions from Pre- and Early Colonial Literature to Early American Romanticism, over 70 historical images, in-depth biographies of each author, reading and review questions

Attribution: *Becoming America: An Exploration of American Literature from Precolonial to Post-Revolution* edited by Wendy Kurant is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

British Literature: Middle Ages to the Eighteenth Century and Neoclassicism

Edited by: B. J. Robinson and Laura Getty, University of North Georgia

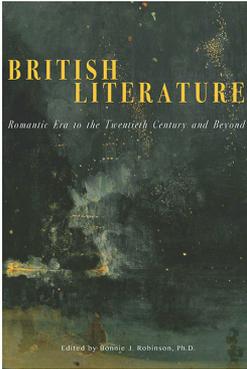

Featuring over 50 authors and full texts of their works, this anthology follows the shift of monarchic to parliamentary rule in Britain, and the heroic epic to the more egalitarian novel as genre.

Attribution: British Literature: Middle Ages to the Eighteenth Century and Neoclassicism edited by B.J. Robinson and Laura Getty is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

British Literature II: Romantic Era to the Twentieth Century and Beyond

Edited by: B. J. Robinson, University of North Georgia

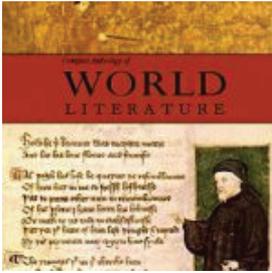

Featuring 37 authors and full texts of their works, the selections in this open anthology represent the literature developed within and developing through their respective eras. This completely-open anthology will connect students to the conversation of literature that has captivated readers in the past and still holds us now.

Attribution: British Literature II: Romantic Era to the Twentieth Century and Beyond edited by B.J. Robinson and Laura Getty is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Compact Anthology of World Literature Parts 1, 2, and 3

Edited by: Laura Getty and Kyoungnye Kwon, University of North Georgia

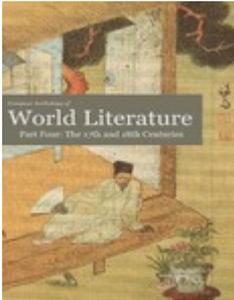

A world literature class may be the first place that some students have encountered European works, let alone non-Western texts. The emphasis in this anthology, therefore, is on non-Western and European works, with only the British authors who were the most influential to European and non-Western authors (such as Shakespeare, whose works have influenced authors around the world to the present day).

Attribution: Compact Anthology of World Literature Parts 1, 2, and 3 edited by Laura Getty and Kyoungnye Kwon is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Compact Anthology of World Literature II: Volumes 4, 5, and 6

Edited by: Anita Turlington, Matthew Horton, Karen Dodson, Laura Getty, Kyoungnye Kwon, and Laura Ng, University of North Georgia

The three parts of the text are organized into the following units: Part 4–The Seventeenth and Eighteenth Centuries (The Age of Reason, The Near East and Asia), Part 5–The Long Nineteenth Century (Romanticism, Realism), and Part 6–The Twentieth Century and Contemporary Literature (Modernism, Postcolonial Literature, Contemporary Literature).

Includes: Texts from a variety of genres and cultures are included in each unit. Additionally, each selection or collection includes a brief introduction about the author and text(s), and each includes 3 – 5 discussion questions.

Attribution: Compact Anthology of World Literature II: Volumes 4, 5, and 6 edited by Anita Turlington, Matthew Horton, Karen Dodson, Laura Getty, Kyoungnye Kwon, and Laura Ng is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

English Literature: Victorians and Moderns

Edited by: James Sexton

English Literature: Victorians and Moderns

English Literature: Victorians and Moderns

is an anthology with a difference. In addition to providing annotated teaching editions of many of the most frequently-taught classics of Victorian and Modern poetry, fiction and drama, it also provides a series of guided research casebooks which make available numerous published essays from open access books and journals, as well as several reprinted critical essays from established learned journals such as *English Studies in Canada* and the *Aldous Huxley Annual* with the permission of the authors and editors. Designed to supplement the annotated complete texts of three famous short novels: Henry James's *The Turn of the Screw*, Joseph Conrad's *Heart of Darkness*, and Aldous Huxley's *Brave New World*, each casebook offers cross-disciplinary guided research topics which will encourage majors in fields other than English to undertake topics in diverse areas, including History, Economics, Anthropology, Political Science, Biology, and Psychology. Selections have also been included to encourage topical, thematic, and generic cross-referencing. Students will also be exposed to a wide-range of approaches, including new-critical, psychoanalytic, historical, and feminist.

Attribution: *British Literature II: Romantic Era to the Twentieth Century and Beyond* edited by John Sexton is licensed under a Creative Commons Attribution International License.

Literature, the Humanities, and Humanity

By: Theodore L. Steinberg, SUNY Fredonia

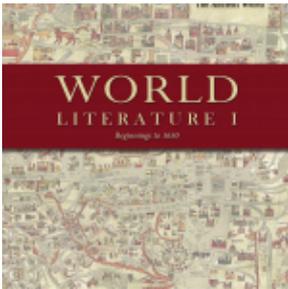

This English open text has been positively peer-reviewed and has been successfully adopted by other faculty. It covers concepts in 21st-century migration, from human rights to the 2015 migrant crisis.

Includes: instructor resources, student resources, and summaries

Attribution: *Literature, the Humanities, and Humanity* by Theodore L. Steinberg is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

World Literature I: Beginnings to 1650

By: Laura Getty and Kyounghe Kwon, University of North Georgia Press

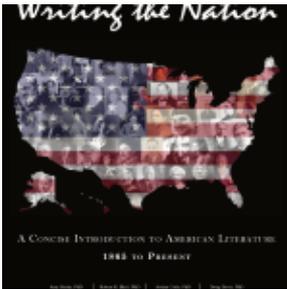

This peer-reviewed *World Literature I* anthology includes introductory text and images before each series of readings. Sections of the text are divided by time period in three parts: the Ancient World, Middle Ages, and Renaissance, and then divided into chapters by location.

Attribution: *World Literature I: Beginnings to 1650* by Laura Getty

and Kyounghe Kwon is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Writing the Nation: A Concise Introduction to American Literature 1865 to Present

By: Amy Berke, Robert Bleil, and Jordan Cofer, University of North Georgia Press

Writing the Nation: A Concise Guide to American Literature 1865 to Present is a text that surveys key literary movements and the American authors associated with the movement. Topics include late romanticism, realism, naturalism, modernism, and modern literature.

Attribution: *Writing the Nation: A Concise Introduction to American Literature 1865 to Present* by Amy Berke, Robert Bleil, and Jordan Cofer is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Writing

Write Here, Right Now: An Interactive Introduction to Academic Writing and Research

By: Aaron Tucker, Paul Chafe and others, Ryerson University

Write Here, Right Now: An Interactive Introduction to Academic Writing and Research is a writing e-textbook for first year arts and social science university students designed to integrate into the flipped classroom model.

Includes: Videos and activities

Attribution Statement: *Write Here, Right Now: An Interactive Introduction to Academic Writing and Research* by Aaron Tucker, Paul Chafe and others is licensed under a Creative Commons Attribution 4.0 International License.

Writing and Literature: Composition as Inquiry, Learning, Thinking, and Communication

By: Tanya Long Bennet, University of North Georgia

COMPOSITION AS INQUIRY, LEARNING, THINKING, AND COMMUNICATION

TANYA LONG BENNETT

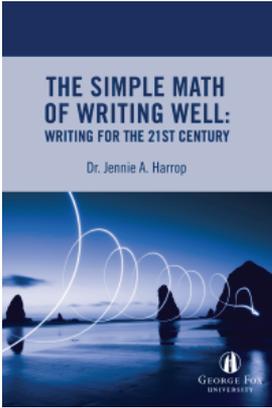

Writing and Literature builds a new conversation covering various genres of literature and writing. Students learn the various writing styles appropriate for analyzing, addressing, and critiquing these genres including poetry, novels, dramas, and research writing. The text and its pairing of helpful visual aids throughout emphasizes the importance of critical reading and analysis in producing a successful composition. (From BCcampus)

Attribution Statement: *Writing and Literature: Composition as Inquiry, Learning, Thinking, and Communication* by Tanya Long Bennetis is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

The Simple Math of Writing Well: Writing for the 21st Century

By: Jennie A. Harrop, George Fox University

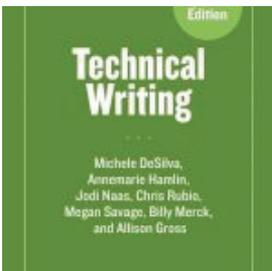

The Simple Math of Writing Well is a guide that directly addresses the importance of writing well in the Google age. It focuses on the basics of linguistic structure that enable 21st-century writers to embrace a variety of mediums that define our internet-connected world.

Attribution: *The Simple Math of Writing Well: Writing for the 21st Century* by Jennie A. Harrop is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Technical Writing

By: Allison Gross, Annemarie Hamlin, Billy Merck, Chris Rubio, Jodi Naas, Megan Savage, and Michele DeSilva, Open Oregon

This open textbook offers students of

technical writing an introduction to the processes and products involved in professional, workplace, and technical writing. The text is broken up into sections reflecting key components of researching, developing, and producing a technical report. Readers will also learn about other professional communication, designing documents, and creating and integrating graphics. Written especially for an academic setting, this book provides readers with guidance on information literacy and documenting sources. This book was collected, adapted, and edited from multiple openly licensed sources.

Attribution Statement: *Technical Writing* by Allison Gross, Annemarie Hamlin, Billy Merck, Chris Rubio, Jodi Naas, Megan Savage, and Michele DeSilva is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Public Domain Resources

Any works that are in the Public Domain (creative works to which no exclusive intellectual property rights apply) can be freely used in your courses. These texts can be hosted at Ryerson and customized (introductions, glossaries, annotations, supplementary materials) for your course.

Examples: Autobiography of Alice B. Toklas, Tartuffe

Project Gutenberg

Project Gutenberg is a library of over 60,000 free eBooks that is a great resource for finding out-of-copyright works. Project

Gutenberg eBooks are mostly older literary works, published before 1924.

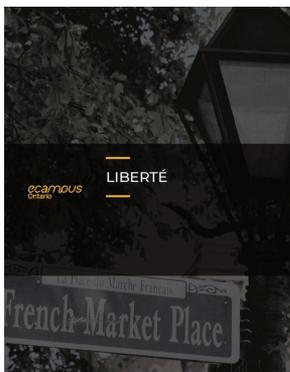

Contact your subject librarian for more information on finding and using public domain works.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

French

Liberté*

By: Gretchen Angelo, California State University, Los Angeles

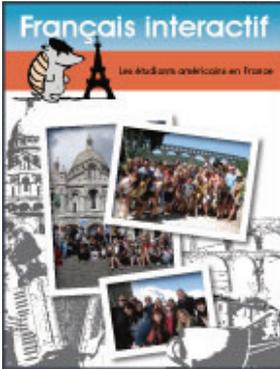

This is an introductory level French textbook that is focused on the communicative approach. Each chapter includes around communicative strategies, culture and grammar.

Includes: end-of-chapter exercises.

Attribution: *Liberté** by Gretchen Angelo is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Français Interactif

By: Karen Kelton, Nancy Guilloteau, Carl Blyth, University of Texas at Austin

This open textbook accompanies course content that explores the French language and culture by following the lives of students participating in an intensive French language programming.

Includes: videos, audio vocabulary recordings, phonetics lessons, and online activities.

Attribution: *Français Interactif* by Karen Kelton, Nancy Guilloteau and Carl Blyth is licensed under a Creative Commons Attribution 4.0 International License.

Introduction to French

By: Rita Palacios, Conestoga College

INTRODUCTION TO FRENCH

SCHOOL OF LIBERAL STUDIES

Introduction to French is a basic French language textbook designed to develop reading, writing, and speaking skills of college students in classrooms across Canada.

Includes: audio files.

Attribution: *Introduction to French* by Rita Palacios is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

Gender and Sexuality

Introduction to Women Gender Sexuality Studies

By: Miliann Kang, Donovan Lessard, Laura Heston, and Sonny Nordmarken, University of Massachusetts

**Introduction to Women,
Gender, Sexuality Studies**

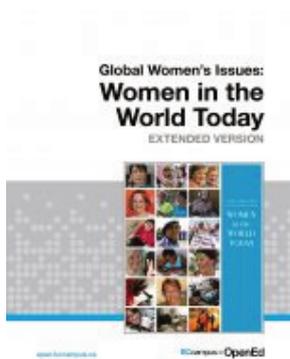

This reviewed open textbook covers various topics that introduce the interdisciplinary field of Women, Gender, Sexuality Studies (WGSS) and how scholars in different disciplines incorporate gender as a critical tool in their analysis.

Includes: videos.

Attribution: *Introduction to Women Gender Sexuality Studies* by Miliann Kang, Donovan Lessard, Laura Heston and Sonny Nordmarken is licensed under a Creative Commons Attribution 4.0 International License.

Global Women's Issues: Women in the World Today – Extended version

By: United States Department of State, Bureau of International Information Programs, Janni Aragon, Mariel Miller, University of Victoria

We cannot solve global challenges unless women participate fully in efforts to find solutions. Female participation in the private sector is a crucial economic driver for societies worldwide. Economic security benefits every facet of a woman's life, with positive effects on the health, education and vitality of families. Learn about women who are changing their societies for the better.

Includes: quizzes, primary sources.

Geography

Physical Geography

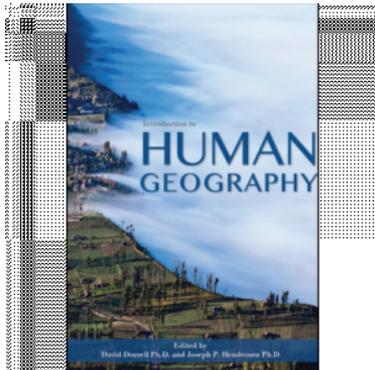

Physical Geography.

This Lumen Learning text covers some of the concepts of first-year physical geography with a balance of application and theory.

Includes: summaries, examples, videos, and graphics.

Introduction to Human Geography

By: David Dorrell, University System of Georgia – Georgia Gwinnett College

This physical geography text has been positively-reviewed. It covers introductory concepts in human geography, from migration to agriculture.

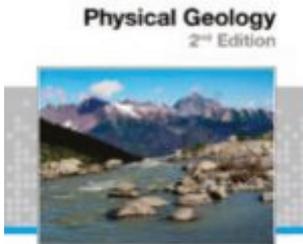

Includes: instructor resources, student resources, and summaries.

Attribution: *Introduction to Human Geography* by David Dorrell, is licensed under a Creative Commons Attribution 4.0 International license.

Physical Geology (2nd Edition)

By: Steven Earle, Thompson Rivers University

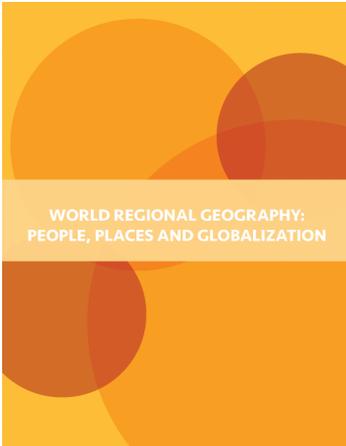

Physical Geology is a comprehensive introductory text on the physical aspects of geology, including rocks and minerals, plate tectonics, earthquakes, volcanoes, glaciation, groundwater, streams, coasts, mass wasting, climate change, planetary geology and much more. It has a strong emphasis on examples from western Canada, especially British Columbia, and also includes a chapter devoted to the geological history of western Canada. The book is a collaboration of faculty from Earth Science departments at Universities and Colleges across British Columbia and elsewhere.

Includes: applications, chapter summaries, exercises, and solutions.

Attribution: *Physical Geology - 2nd Edition* by Steven Earle is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

World Geography

World Regional Geography: People, Places and Globalization

This world geography text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in geography, from North American geography to African geography.

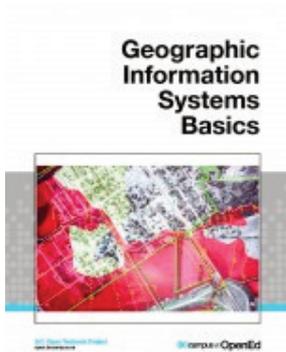

Includes: instructor resources, student resources, and summaries.

Attribution: *World Regional Geography: People, Places and Globalization* is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Geographic Information Systems

Geographic Information System Basics

By: Jonathan E. Campbell, UCLA, Michael Shin, UCLA

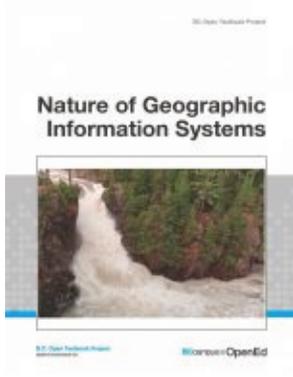

This geographic information systems text has been positively-reviewed. It covers introductory concepts in GIS, from augmented maps to vector files.

Includes: instructor resources, student resources, and summaries.

Attribution: *Geographic Information System Basics* by Jonathan E. Campbell, and Michael Shin is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Nature of Geographic Information

By: David DiBiase, Penn State

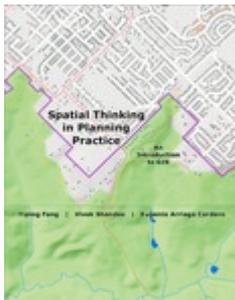

This world GIS text has been positively-reviewed. It covers introductory concepts in GIS, from data and information geography to integrating geographic data.

Includes: instructor resources, student resources, and summaries.

Attribution: *Nature of Geographic Information* by David DiBiase is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Spatial Thinking in Planning Practice: An Introduction to GIS

By: Yiping Fang, Vivek Shandas, and Eugenio Arriaga, Portland State University

The goals of this textbook are to help students

acquire the technical skills of using software and managing a database, and develop research skills of collecting data, analyzing information and presenting results. We emphasize that the need to investigate the potential and practicality of GIS technologies in a typical planning setting and evaluate its possible applications. GIS may not be necessary (or useful) for every planning application, and we anticipate these readings to provide the necessary foundation for discerning its appropriate use. Therefore, this textbook attempts to facilitate spatial thinking focusing more on open-ended planning questions, which require judgment and exploration, while developing the analytical capacity for understanding a variety of local and regional planning challenges.

Attribution: *Spatial Thinking in Planning Practice: An Introduction to GIS* by Yiping Fang, Vivek Shandas, and Eugenio Arriaga is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Earth Science

This text includes introductions to concepts from level I earth science courses, from geology to water systems. It was developed through Lumen Learning and a professor of Geology and Earth Sciences from Santa Ana College.

Includes: exercises and summaries.

Open Geography

This website is a resource dedicated to providing high-quality and free online geography resources. There are two relevant textbooks for first-year Geography and Earth Sciences courses which include

the majority of topics covered by these first-year courses. The textbooks are Introduction to Human Geography and Introduction to Physical Geography.

Includes: several textbooks, mapping assignments, and a collection of online resources.

Geosciences LibreTexts Library

A collection of open textbooks, assignments, and other educational resources on the subject of geosciences.

Includes: lab experiments, case studies, interactive applications and worksheets.

If you have questions about Open Educational Resources in your subject area, please contact your subject liaison librarian.

History

Canadian History: Pre-Confederation

By: John Douglas Belshaw, Thompson Rivers University

Canadian History: Pre-Confederation is a survey text that introduces undergraduate students to important themes in North American history to 1867. Written and reviewed by subject experts drawn from colleges and universities, this is the first open textbook on the topic of Canadian history.

Includes: instructor resources (videos)

Attribution: *Canadian History: Pre-Confederation* by John Douglas Belshaw is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

Canadian History: Post-Confederation

By: John Douglas Belshaw, Thompson Rivers University

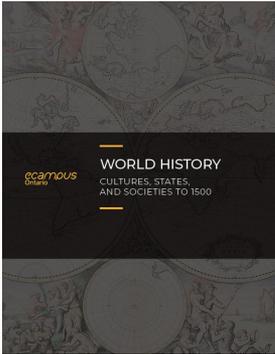

This textbook introduces aspects of the history of Canada since Confederation. “Canada” in this context includes Newfoundland and all the other parts that come to be aggregated into the Dominion after 1867.

Includes: instructor resources (videos).

Attribution: *Canadian History: Post-Confederation* by John Douglas Belshaw is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

World History: Cultures, States, and Societies to 1500

By: Eugene Berger, George L. Israel, Charlotte Miller, Brian Parkinson, Andrew Reeves and Nadejda Williams, Georgia Gwinnett College

World History: Cultures, States, and Societies to 1500 is a peer-reviewed textbook which offers a comprehensive introduction to the history of humankind from prehistory to 1500.

Includes: high-resolution images and maps, chronologies, and learning questions to help guide student learning.

Attribution: *World History: Cultures, States, and Societies to 1500* by Eugene Berger, George L. Israel, Charlotte Miller, Brian Parkinson, Andrew Reeves and Nadejda Williams is licensed under a Creative Commons Attribution ShareAlike (CC BY-SA) 4.0 International License.

Yale Lectures: The Early Middle Ages, 284–1000

This open course looks into the major developments in the political, social, and religious history of Western Europe from the accession of Diocletian to the feudal transformation.

Includes: all course materials (zipped file).

U.S. History

This open textbook covers the breadth of the chronological history of the United States and the key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class, and gender.

Includes: instructor and student resources.

Sage American History – Era of the American Revolution

This peer-reviewed open textbook is a comprehensive look at the American Revolution, containing links to primary source documents and other resources of this important era in U.S. history.

Includes: instructor and student resources.

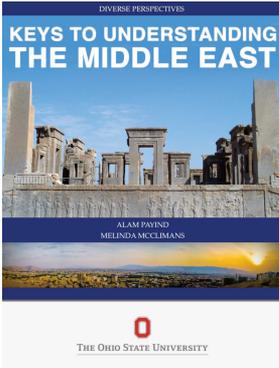

Global History and New Polycentric Approaches

This well-reviewed open textbook rethinks the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, and considers how global issues are connected with our local and national communities.

Includes: learner exercises

Keys to Understanding the Middle East

By: Alam Payind and Melinda McClimans, Ohio State University

This reviewed open textbook covers the fundamentals and is intended for readers who have never studied the Middle East, or experts who may wish to fill gaps in their knowledge of the region from other disciplines.

Includes: instructor and student resources

Attribution: *Key to Understanding the Middle East* by Alam Payind and Melinda McClimans is licensed under a Creative Commons Attribution ShareAlike (CC BY-SA) 4.0 International License

Historical and Contemporary Realities: Movement Towards Reconciliation

This open textbook is written as a resource for educators to teach students about the Indigenous historical significance of the lands encompassing the Robinson-Huron Treaty area and more specifically the Greater Sudbury and Manitoulin area. It also, through the use of interactive mapping strategies, serves as a guide

for educators to develop a similar resource to document Indigenous stories from their own areas.

Includes: instructor and student resources

Western Civilization: A Concise History – Volume 1

This peer-reviewed open textbook is about the origins of civilization in Mesopotamia c. 8,000 BCE through the early Middle Ages in Europe c. 1,000 CE. This volume covers topics including Mesopotamia, Egypt, Persia, Greece, Rome, the Islamic caliphates, and the early European Middle Ages.

Western Civilization: A Concise History – Volume 2

This open textbook looks at the early Middle Ages to the French Revolution in 1789 CE. This volume covers topics including the High Middle Ages, the Renaissance, the European conquest of the Americas, the Reformation, the Scientific Revolution, and the Enlightenment.

Western Civilization: A Concise History – Volume 3

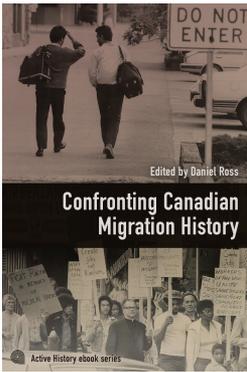

This open textbook looks at the Napoleonic era to the recent past. Volume 3 covers topics including the Industrial Revolution, the politics of Europe in the nineteenth century, modern European

imperialism, the world wars, fascism, Nazism, and the Holocaust, the postwar era, the Cold War, and recent developments in economics and politics.

Confronting Canadian Migration History

Edited by: Daniel Ross, Université du Québec à Montréal

The essays published here speak to the broad range of research being done in Canadian migration history; they also highlight the commitment of their authors to an engaged, public-facing scholarly practice. Read together, we believe they offer a much-needed historical perspective on contemporary Canadian debates around immigration and refuge, questions that cut to the heart of who we are as a society.

Indigenous Studies

Restoring Indigenous Self-Determination: Theoretical and Practical Approaches

Edited by: Marc Woons, University of Leuven

This Indigenous Studies text has been positively-reviewed and has been successfully adopted by other faculty. It covers concepts in Indigenous Self-Determination, from definitions to the UN declaration on Tibet.

Includes: instructor resources, student resources, summaries.

Attribution: *Restoring Indigenous Self-Determination: Theoretical and Practical Approaches* edited by Marc Woons is licensed under a Creative Commons Attribution Non-Commercial (CC BY-NC) 4.0 International License.

Education

Knowing Home: Braiding Indigenous Science with Western Science, Book 1

By: Gloria Snively and Wanosts'a7 Lorna Williams, University of Victoria

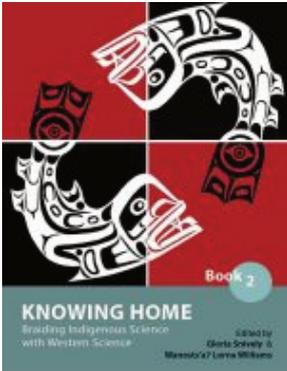

Since Indigenous peoples have developed time-proven approaches to sustaining both community and environment, Elders and young people are concerned that this rich legacy of Indigenous Science with its wealth of environmental knowledge and the wisdom of previous generations could disappear if it is not respected, studied and understood by today's children and youth. This book takes a step forward toward preserving and actively using the knowledge, stories, and lessons for today and future generations, and with it a worldview that informs everyday attitudes toward the earth.

Attribution: *Knowing Home: Braiding Indigenous Science with Western Science, Book 1* by Gloria Snively, Wanosts'a7 Lorna Williams is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Knowing Home: Braiding Indigenous Science with Western Science, Book 2

By: Gloria Snively and Wanosts'a7 Lorna Williams, University of Victoria

Indigenous Science examples, research, and curriculum models to inspire deep reflection regarding the under-representation of Aboriginal students in the sciences. It is intended that the rich examples and cases, combined with the resources listed in the appendices, will enable teachers and students to explore Indigenous Science examples in the classroom, and in addition, support the development of curriculum projects in home places.

Includes: curriculum examples.

Pulling Together: A Guide for Indigenization of

Post-Secondary Education

By: Kory Wilson, Sybil Harrison, Janice Simcoe, Dawn Smith, Jennifer Stein, Asma-na-hi Antoine, Rachel Mason, Roberta Mason, Sophia Palahicky, Carmen Rodriguez de France, Bruce Allan, Amy Perreault, John Chenoweth, Dianne Biin, Sharon Hobenshield, Todd Ormiston, Shirley Anne Hardman, Louise Lacerte, Lucas Wright, Justin Wilson, Ian Cull, Robert L. A. Hancock, Stephanie McKeown, Michelle Pidgeon, Adrienne Vedan

An open professional learning series developed for staff across post-secondary institutions in British Columbia. These guides are the result of the Indigenization Project, a collaboration between BCcampus and the Ministry of Advanced Education, Skills and Training. The project was supported by a steering committee of Indigenous education leaders from BC universities, colleges, and institutes, the First Nations Education Steering Committee, the Indigenous Adult and Higher Learning Association, and Métis Nation BC. These guides are intended to support the systemic change occurring across post-secondary institutions through Indigenization, decolonization, and reconciliation.

Health Care

Northern and Indigenous Health and Health Care

By: Heather Exner-Pirot, University of Saskatchewan; Bente Norbye, UiT the Arctic University of Norway; and Lorna Butler, University of Saskatchewan

NORTHERN AND INDIGENOUS HEALTH AND HEALTHCARE

Editors: Heather Exner-Pirot, Bente Norbye, and Lorna Butler

OPEN EDUCATION RESOURCE
Available at:
<https://openpress.usask.ca/northernhealthcare/>
and
<http://www.northernopeneducation.com>

Northern health care is unique. The Circumpolar North is characterized by small communities in sparsely populated regions, separated by large distances and marked by distinct cultures. Weather – cold, snow, ice and wind – influences everything, including the practice of health care. With this volume, we hope to address a fundamental gap in nursing and health science education: a lack of textbooks or other resources that are focused on northern and Indigenous health care.

Includes: review questions.

Attribution: Northern and Indigenous Health and Health Care by Heather Exner-Pirot, Bente Norbye and Lorna Butler is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

Philosophy

The Originals: Classic Readings in Western Philosophy

By: Jeff McLaughlin, Thompson Rivers University

This peer-reviewed, open textbook provides readers with an appreciation and understanding of philosophy framed by the very words and ideas of those who have shaped our thinking over the centuries.

Includes: primary source documents.

Attribution: *The Originals: Classic Readings in Western Philosophy* by Jeff McLaughlin is licenced under a Creative Commons Attribution (CC BY) 4.0 International License.

An Introduction to Philosophy

By: W. Russ Payne, Bellevue College

This peer-reviewed open textbook presents philosophy to newcomers as a living discipline with historical roots. Early chapters are historically organized, to help trace a developmental progression of thought that introduce basic philosophical methods and frames issues that remain relevant today.

Includes: instructor resources.

Attribution: *An Introduction to Philosophy* by W. Russ Payne is licensed under a Creative Commons Attribution Non-Commercial (CC BY-NC) 4.0 International License.

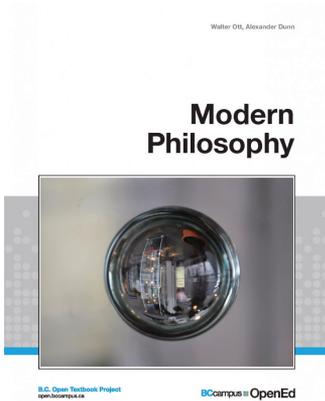

Analyzing Meaning: An Introduction to Semantics and Pragmatics

This open textbook provides an introduction to the study of meaning in human language, from a linguistic perspective including foundational concepts, word meanings, implicature (including indirect speech acts), compositional semantics, modals, conditionals, and causation and tense & aspect.

Includes: instructor resources.

Modern Philosophy

By: Walter Ott and Alex Dunn

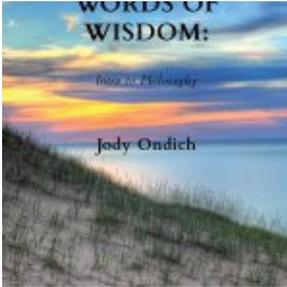

This well reviewed open textbook in modern philosophy combines readings from primary sources with two pedagogical tools.

Attribution: Modern Philosophy by Walter Ott and Alex Dunn is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (CC BY-NC-SA) 4.0 International License.

Words of Wisdom: Intro to Philosophy

By: Jody Ondich, Lake Superior College

Words of Wisdom can come from anyone. In this text we discuss topics ranging from “Are Humans good by nature?” to “Is there a God?” to “Do I have the right to my own opinion?” Philosophy is the study of wisdom, and can emerge in our conversations in social media, in school, around the family dinner table, and even in the car. The text uses materials that are 2,500 years old, and materials that were in the news this year. Wise people come in all shapes and types, and from every culture on earth. We have poetry and folktales, sacred writings and letters. Dialogues and interviews, news columns, Ted Talks, You Tube recordings and even comedy are all a part of the content in this text.

Attribution: Words of Wisdom: Intro to Philosophy by Jody Ondich is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (CC BY-NC-SA) 4.0 International License.

Logic and Critical Thinking

Introduction to Logic and Critical Thinking

By: Matthew J. Van Cleave, Lansing Community College

This is an introductory textbook in logic and critical thinking, aimed at providing the reader with a set of tools and skills that will enable them to identify and evaluate arguments.

Includes: exercises.

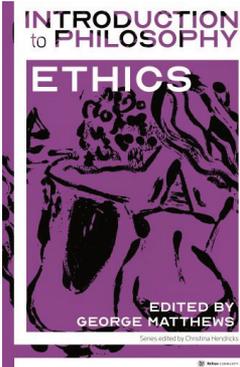

Attribution: *Introduction to Logic and Critical Thinking* by Matthew J. Van Cleave is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

A Concise Introduction to Logic

Concise Introduction to Logic is an introduction to formal logic suitable for undergraduates taking a general education course in logic or critical thinking, and is accessible and useful to any interested in gaining a basic understanding of logic.

Introduction to Philosophy: Ethics

By: George Matthews, Plymouth State University and Christina Hendricks, University of British Columbia

This text examines some of the main threads of discussion on judgments about good and bad, right and wrong. It considers basic questions about moral and ethical judgment: Is there such a thing as something that is really right or really wrong independent of time, place and perspective? What is the relationship between religion and ethics? How can we reconcile self-interest and ethics? Is it ever acceptable to harm one person in order to help others?

Attribution: *Introduction to Philosophy: Ethics* by George Matthews and Christina Hendricks is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

Politics and Governance

Theory

Nationalism, Self-determination and Secession

By: Geoff Andrews and Michael Saward, Open University

This text on nationalism covers salient issues in the nation-building using themes of nationalism, self-determination, and secession to tie nation-building in with world politics. It covers introductory concepts in politics, from statehood to national self-determination.

Includes: instructor resources, student resources, and summaries.

Attribution: *Nationalism, Self-determination and Secession* by Geoff Andrews and Michael Saward is licensed under

a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

International Relations Theory

This libre text on international relations theory text covers introductory concepts in political science. It covers concepts in political science, from constructivism to post-colonialism.

Includes: instructor resources, student resources, and summaries.

Popular Culture and World Politics: Theories, Methods, Pedagogies

This political science text covers salient issues in popular culture and world politics. It covers concepts in popular culture, from comics to video games.

Includes: instructor resources, student resources, and summaries.

Realism in Practice

This politics text covers issues in realism using a practical approach. It covers concepts in realism, from the refugee crisis to peaceful change.

Includes: instructor resources, student resources, and summaries.

Democracy in Brief

This democracy text covers introductory concepts in democracy, from rights change to political parties.

Includes: instructor resources, student resources, and summaries.

American Government

American Government: OpenStax

This OpenStax government text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in American government, from civil liberties to domestic policy.

Includes: instructor resources, student resources, and summaries.

Global Political Issues

Global Women's Issues: Women in the World Today

This global politics text has been positively-reviewed and has been successfully adopted by other faculty. It covers concepts in women's political issues, from women and education to the rights of children.

Includes: instructor resources, student resources, and summaries.

Critical Epistemologies of Global Politics

This politics text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in epistemologies of global politics, from decolonial feminism to ontological violence.

Includes: instructor resources, student resources, and summaries.

Environment, Climate Change and International Relations

This world international relations text covers introductory concepts in climate politics, from fossil fuel divestment to global climate finance.

Includes: instructor resources, student resources, and summaries.

Critical Perspectives on Migration in the Twenty-First Century

This migration text has been positively-reviewed and has been successfully adopted by other faculty. It covers concepts in 21st-century migration, from human rights to the 2015 migrant crisis.

Includes: instructor resources, student resources, and summaries.

Migration and the Ukraine Crisis: A Two Country Perspective

This migration text has been positively-reviewed and has been successfully adopted by other faculty. It focuses on the 2014 Ukraine crisis and the ongoing war for Crimea, covering introductory concepts in migration studies, from geopolitical fault-lines to labour migration.

Includes: instructor resources, student resources, and summaries.

Middle-Eastern Politics

Keys to Understanding the Middle East

This Middle-Eastern politics text has been positively-reviewed. It covers introductory concepts in Middle-Eastern politics, from religious identity to stateless nations.

Includes: instructor resources, student resources, and summaries.

The Arab Spring of Discontent

This Middle-Eastern politics text has been positively-reviewed. It covers concepts in the Arab Spring, from tensions in Tunisia to the fall of the Egyptian regime.

Includes: instructor resources, student resources, and summaries.

The R2P: Challenges and Opportunities in Light of the Libyan Intervention

This text has been positively-reviewed. It covers the Liberian intervention, from the revolution to peacemaking.

Includes: instructor resources, student resources, and summaries.

Rights

The Universal Declaration of Human Rights in the 21st Century: A Living Document in a Changing World

This rights text has been positively-reviewed. It covers concepts in the UDHR, from the conception of the UDHR to the implementation of human rights.

Includes: instructor resources, student resources, and summaries.

Contemporary Issues in Human Rights Law

This human rights text has been positively-reviewed. It covers concepts in rights, from mechanisms to protect human rights to china's development banks in Asia.

Includes: instructor resources, student resources, and summaries.

The Distinction of Peace

This peer-reviewed open textbook provides a critical account of the social mechanisms that make up the peace-building field, and offers deep insights into the workings of Western domination and global inequalities.

Includes: instructor and student resources.

Peace and Democratic Society

This peer-reviewed open textbook highlights the inadequacies of some of the widely accepted explanations for violence—including the idea that the world is experiencing a ‘clash of civilizations’—the author makes a plea for a global, multilateral debate on the causes of conflict, and an understanding of the multiple identities of the individuals involved.

The Universal Declaration of Human Rights in the 21st Century: A Living Document in a Changing World

This peer-reviewed open textbook offers a 21st-century commentary on the original Universal Declaration of Human Rights document, furthering the work of human rights and illuminating the ideal of global citizenship.

Psychology

Introduction to Psychology – First Canadian Edition

By Jennifer Walinga, Royal Roads University, and Charles Stangor, University of Maryland

This textbook is an adaptation of the open Introduction to Psychology book by Charles Stangor, a professor of psychology at the University of Maryland. A psychology professor from Royal Roads University adapted it as part of the B.C. Open Textbook Project and added several case studies, examples, and sections. This textbook, and its original version, have both been successfully adopted and has over a 4.5/5 rating from several professors.

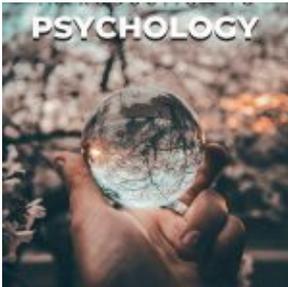

Includes: instructor resources, student resources, applications, summaries, case studies, and exercises and critical thinking problems.

Attribution: *Introduction to Psychology – First Canadian Edition* By Jennifer Walinga and Charles Stangor is licensed under a Creative

Commons Attribution-NonCommercial-Share Alike 4.0
International License, except where otherwise noted

Introduction to Psychology

By Jorden A. Cummings and Lee Sanders, University of Saskatchewan

This textbook is an adaptation of existing open materials (*Introduction to Psychology – 1st Canadian Edition*, *Research Methods in Psychology – 3rd American Edition*, and The Noba Project) along with new content.

Includes: Interactive H5P activities

Attribution: *Introduction to Psychology* by Jorden A. Cummings & Lee Sanders is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Psychology: OpenStax

By: Rose M. Spielman

Psychology is designed to meet scope and sequence requirements

for the single-semester introduction to psychology course. The book offers a comprehensive treatment of core concepts, grounded in both classic studies and current and emerging research.

Includes: applications, instructor resources, student resources, animations and simulations, as well as content, critical thinking, and reflection exercises.

Moving Pictures: An Introduction to Cinema

By: Russell Sharman, University of Arkansas in Fayetteville

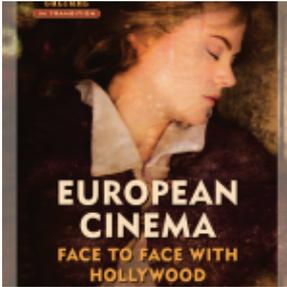

An introduction to the art and science of moving pictures, offering in-depth exploration of how cinema communicates, and what, exactly, it is trying to say.

Attribution: *Moving Pictures: An Introduction to Cinema* by Russell Sharman is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (CC BY-NC-SA) 4.0 International License.

European Cinema – Face to Face with Hollywood

By: Thomas Elsaesser

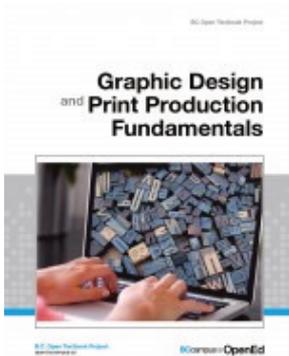

In the face of renewed competition from Hollywood since the early 1980s and the challenges posed to Europe's national cinemas by the fall of the Wall in 1989, independent filmmaking in Europe has begun to re-invent itself. *European Cinema: Face to Face with Hollywood* re-assesses the different debates and presents a broader framework for understanding the forces at work since the 1960s. These include the interface of “world cinema” and the rise of Asian cinemas, the importance of the international film festival circuit, the role of television, as well as the changing aesthetics of auteur cinema. New audiences have different allegiances, and new technologies enable networks to reshape identities, but European cinema still has an important function in setting critical and creative agendas, even as its economic and institutional bases are in transition

Web Design

Web Design Primer 

By: Richard Adams and Ahmed Sagarwala, Ryerson University

This book was written for a one-semester course in web design. The goal of the book is to provide students with a reference on some of the latest web design practices that is short and to-the-point, low-cost, and readily accessible.

Attribution: *Web Design Primer* by Richard Adams and Ahmed Sagarwala is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

Introduction to Web Accessibility

By: Digital Education Strategies, The Chang School, Ryerson University

Much of the current information on Web

accessibility requires some technical understanding, and may be difficult to consume for the average person. The instruction here will “interpret” the W3C Web Content Accessibility Guidelines (WCAG 2.1), to make it easier to understand for a general audience. You will have an opportunity to experience barriers firsthand, then experience that content with the barriers removed, developing a practical understanding of web accessibility.

Journalism Skills

By: Lisa Taylor, Gavin Adamson and Nicole Blanchett Neheli, Ryerson University

Journalism Skills

The topics for these six new modules were chosen after extensive consultation with our undergraduate faculty members. These six modules can be used as stand-alone learning objects, or provided as a “set” of modules to enhance an introductory level course provided as a hybrid model. Each of the modules’ primary topics will be addressed in three to five minute videos that situate the learning outcomes in the journalism context. In each case, the end of the video begins a formative, self-assessment phase by asking the student to problem solve. Next, multiple-choices and true-false quizzes deliver more formative assessment, offering tips and full solution options.

Includes: Modules with videos and self-assessment quizzes.

Exploring Movie Construction & Production: What's so exciting about movies?

By: John Reich, Genesee Community College

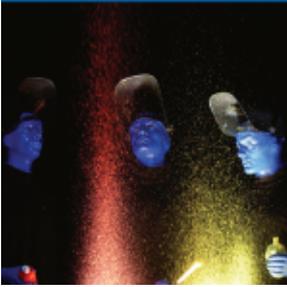

Exploring Movie Construction & Production contains eight chapters of the major areas of film construction and production. The discussion covers theme, genre, narrative structure, character portrayal, story, plot, directing style, cinematography, and editing. Important terminology is defined and types of analysis are discussed and demonstrated. An extended example of how a movie description reflects the setting, narrative structure, or directing style is used throughout the book to illustrate building blocks of each theme. This approach to film instruction and analysis has proved beneficial to increasing students' learning, while enhancing the creativity and critical thinking of the student.

Attribution: *Exploring Movie Construction & Production: What's so exciting about movies?* by John Reich is licensed under Attribution-NonCommercial-ShareAlike.

Theatrical Worlds

By: Charles Mitchell, University of Florida College of Fine Arts

From the University of Florida College of Fine Arts, Charlie Mitchell and distinguished colleagues from across America present an introductory text for theatre and theoretical production. This book seeks to give insight into the people and processes that create theater. It does not strip away the feeling of magic but to add wonder for the artistry that make a production work well.

Attribution: Theatrical Worlds by Charles Mitchell is licensed under Attribution-NonCommercial-ShareAlike.

Principles of Nutrition, 2nd Edition

By: Lisa Jellum, Jason Hitzeman, Mark Knauss, Sharryse Henderson, Tom Harnden, Cynthia Elsberry, and Greg Ford, University System of Georgia

Topics covered: Nutrition Basics, Macronutrient Structures, Macronutrient Digestion, Macronutrient Uptake, Absorption, & Transport, Common Digestive Problems, Macronutrient Metabolism, Integration of Macronutrient Metabolism, Micronutrients Overview & Dietary Reference Intakes (DRIs), Antioxidant Micronutrients, Macronutrient Metabolism Micronutrients, Carbon Metabolism Micronutrients, Blood, Bones & Teeth Micronutrients, Electrolyte Micronutrients, Achieving a Healthy Diet, Diet and Health- Chronic Disease Prevention, Pregnancy and Lactation, Nutrition Infancy through Adolescence, Adulthood and the Later Years, Nutrition and Fitness/Athletes, Nutrition and Society.

Attribution: Principles of Nutrition, 2nd Edition by Lisa Jellum, Jason Hitzeman, Mark Knauss, Sharryse Henderson, Tom Harnden, Cynthia Elsberry, and Greg Ford is licensed under a Creative Commons Attribution-Noncommercial-Share Alike 4.0 License.

Essentials of Nutrition: A Functional Approach

By: Maureen Zimmerman, Mesa Community College, and Beth Snow, University of British Columbia

Essentials of Nutrition: A Functional Approach is written for students who are not majoring in nutrition, but want to learn about the fundamental aspects of nutrition and how it applies to their own lives. We have written this book with the assumption that you have little or no prior knowledge of college level chemistry, biology, or physiology. But that does not mean it's not scientific! Nutrition is a science-based discipline, so all the material included is backed up by rigorous scientific research, but it is presented in a clear, easy-to-understand fashion without requiring a background in science.

Attribution: *Essentials of Nutrition: A Functional Approach* by Maureen Zimmerman and Beth Snow is licensed under a Creative Commons Attribution-Noncommercial-Share Alike 4.0 License.

Occupational and Public Health

Mathematics for Public and Occupational Health Professionals

Edited by: Ian Young, Ryerson University

Mathematics for
Public and Occupational Health
Professionals

This textbook was created to support the study of key mathematical concepts and skills among future occupational and public health professionals. Specifically, it contains material adapted from multiple existing resources on college- and university-level mathematics.

The material is designed for first-year undergraduate occupational and public health students with different backgrounds in mathematics. The material is intended to prepare students for more advanced quantitative courses in biostatistics, epidemiology, and risk assessment, among others.

This text is used in POH103 “Data Management” at Ryerson University.

Attribution: *Mathematics for Public and Occupational Health Professionals* edited by Ian Young is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Social Work

Foundations of Social Work Research

By: Rebecca L. Mauldin, University of Texas at Arlington

This textbook was created to provide an introduction to research methods for BSW and MSW students, with particular emphasis on research and practice relevant to students at the University of Texas at Arlington. It provides an introduction to social work students to help evaluate research for evidence-based practice and design social work research projects. It can be used with its companion, *A Guidebook for Social Work Literature Reviews and Research Questions* by Rebecca L. Mauldin and Matthew DeCarlo, or as a stand-alone textbook.

Attribution: *Foundations of Social Work Research* by Rebecca L. Mauldin is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Guidebook for Social Work Literature Reviews and Research Questions

By: Rebecca L. Mauldin and Matthew DeCarlo, University of Texas at Arlington

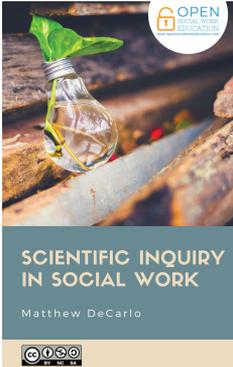

This short guidebook provides information about selecting a research topic and research questions, searching for literature, reading and understanding scholarly writing, and writing a literature review to synthesize what is known and what remains to be learned about a social problem. For students who appreciate the availability of resources on the internet, it also provides links to additional materials. It can be used with its companion textbook, *Foundations of Social Work Research* by Rebecca L. Mauldin and Matthew DeCarlo, or as a stand-alone guide.

Attribution: *Guidebook for Social Work Literature Reviews and Research Questions* by Rebecca L. Mauldin and Matthew DeCarlo is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Scientific Inquiry in Social Work

By: Matthew DeCarlo, Radford University

This social work text has been positively-reviewed. It covers introductory concepts in scientific inquiry with a social work perspective, from ethics to sampling.

Includes: instructor resources, student resources, summaries, and real-world applications.

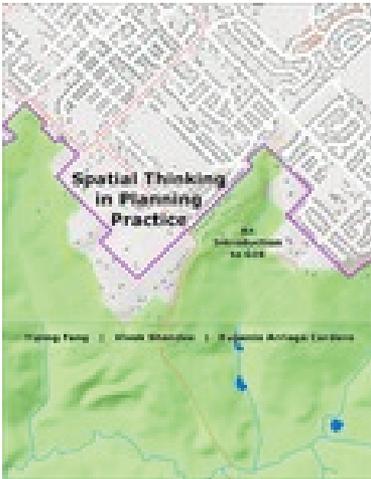

Attribution: *Scientific Inquiry in Social Work* by Matthew DeCarlo is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Urban Planning

Spatial Thinking in Planning Practice: An Introduction to GIS

By: Yiping Fang, Vivek Shandas, and Eugenio Arriaga, Portland State University

The goals of this textbook are to help students acquire the technical skills of using software and managing a database, and develop research skills of collecting data, analyzing information and presenting results.

Attribution: *Spatial Thinking in Planning Practice: An Introduction to GIS* by Yiping Fang, Vivek Shandas, and Eugenio Arriaga is licensed under a Creative Commons Attribution-NonCommercial 4.0 International License.

FACULTY OF
ENGINEERING AND
ARCHITECTURAL SCIENCE

First Year Engineering

A Brief Introduction to Engineering Computation with MATLAB

By: Serhat Beyenir, British Columbia Institute of Technology

Specifically designed for students with no programming experience, the strategic goal of the course and book is to provide learners with an appreciation for the role computation plays in solving engineering problems.

Includes: study guide, problem sets.

Attribution: *A Brief Introduction to Engineering Computation with MATLAB* by Serhat Beyenir is licensed under a Creative Commons Attribution 4.0 International License.

Computer Science 20 – Saskatoon

By: Dan Schellenberg, Saskatoon Public Schools

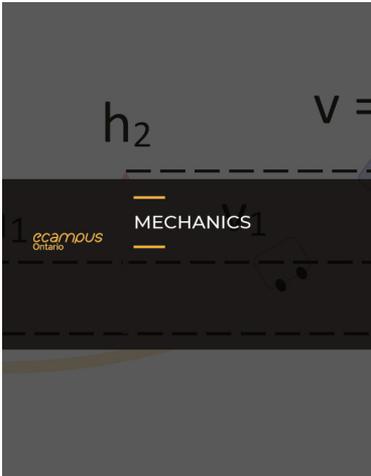

Through its text and videos, this resource provides an interactive experience on learning to write and execute Python code. In addition to simply executing code, there is a unique feature called *codelens* that allows control of the flow of execution in order to gain a better understanding of how the program works.

Includes: videos, quizzes, exercises.

Attribution: *Computer Science 20 – Saskatoon* by Dan Schellenberg is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

Mechanics

By: Benjamin Crowell, Fullerton College

This is a calculus-based open textbook meant for the first semester of a first year survey course taken by engineering and physical science majors. It has a traditional order of topics whereby force is discussed before energy.

Includes: instructor resources (learning evaluation, learning logs), student resources (tutorials, problems and solutions).

Attribution: *Mechanics* by Benjamin Crowell is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

Electrical Engineering

Digital Circuit Projects: An Overview of Digital Circuits Through Implementing Integrated Circuits

By: Charles W. Khann, Gettysburg College

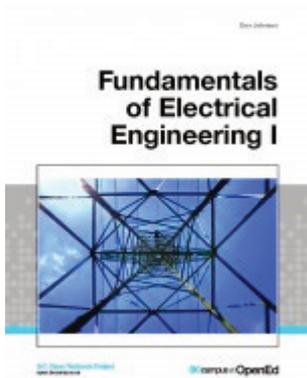

Digital circuits, often called Integrated Circuits or ICs, are the central building blocks of a Central Processing Unit (CPU). To understand how a computer works, it is essential to understand the digital circuits which make up the CPU. This text introduces the most important of these digital circuits; adders, decoders, multiplexers, D flip-flops, and simple state machines.

Attribution: *Digital Circuit Projects: An Overview of Digital Circuits Through Implementing Integrated Circuits* by Charles W. Khann is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Fundamentals of Electrical Engineering I

By: Don Johnson, Rice University

This textbook focuses on the creation, manipulation, transmission, and reception of information by electronic means. Elementary signal theory; time- and frequency-domain analysis; Sampling Theorem. Digital information theory; digital transmission of analog signals; error-correcting codes.

Attribution: *Fundamentals of Electrical Engineering I* by Don Johnson is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Fundamentals of Photonics

This open resource, designed for first and second year students, provides an introduction to photonics. It represents work done through the US National Science Foundation and is made of up ten chapters, or modules, created by various experts in the the field.

Includes: instructor and student resources, problem sets.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Industrial Engineering

Applied Strength of Materials for Engineering Technology [PDF]

By: Barry Dupen, Purdue University Fort Wayne

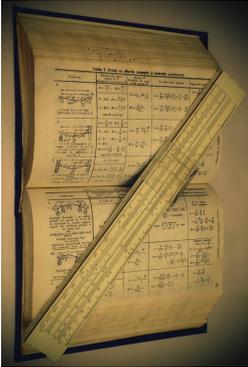

This algebra-based text is designed specifically for Engineering Technology students, using both SI and US Customary units. All example problems are fully worked out with unit conversions. Updated each semester using student comments, with an average of 80 changes per edition.

Attribution: *Applied Strength of Materials for Engineering Technology* by Barry Dupen is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

Strength of Materials Supplement for Power Engineering

By: Alex Podut, British Columbia Institute of Technology

This work complements the *Applied Strength of Materials for Engineering Technology* by Barry Dupen and is used in teaching *Strength of Materials to Power Engineering* students at the British Columbia Institute of Technology.

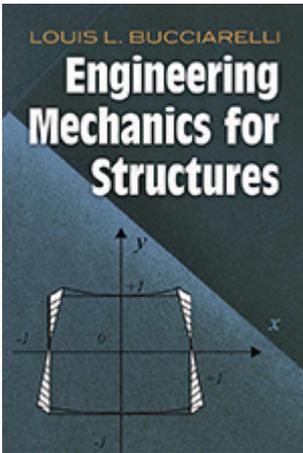

Attribution: *Strength of Materials Supplement for Power Engineering* by Alex Podut is licensed under a Creative Commons Attribution ShareAlike 4.0 International License.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Mechanical Engineering

Engineering Mechanics for Structures

By: Louis L. Bucciarelli, Massachusetts Institute of Technology

This text explores the mechanics of solids and statics as well as the strength of materials and elasticity theory. In addition to introducing the fundamentals of structural analysis, it combines and applies important concepts in engineering mechanics. Its many design exercises encourage creative student initiative and systems thinking.

Attribution: *Engineering Mechanics for Structures* by Louis L. Bucciarelli is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

FACULTY OF SCIENCE

Biology

Concepts of Biology – First Canadian Edition

By: Charles Molnar, Jane Gair, Samantha Fowler, Rebecca Roush, James Wise, Yael Avissar, Jung Choi, Jean DeSaix, Vladimir Jurukovski, Robert Wise, Connie Rye, OpenStax College

This textbook was designed as an introductory biology course for non-science students. It has been successfully adopted and it was written by professors of biology.

Includes: instructor resources, student resources, simulations, summaries, exercises, and solutions.

Attribution: *Concepts of Biology – 1st Canadian Edition* by Charles Molnar, Jane Gair, Samantha Fowler, Rebecca Roush, James Wise, Yael Avissar, Jung Choi, Jean DeSaix, Vladimir Jurukovski, Robert Wise, Connie Rye, OpenStax College is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Biology 2e

By: Mary Ann Clark, Texas Wesleyan University, Matthew Douglas, Grand Rapids Community College, Jung Choi, Georgia Institute of Technology

Biology 2e is designed to cover the scope and sequence requirements of a typical two-semester biology course for science majors. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. *Biology* includes rich features that engage students in scientific inquiry, highlight careers in the biological sciences, and offer everyday applications. The book also includes various types of practice and homework questions that help students understand—and apply—key concepts.

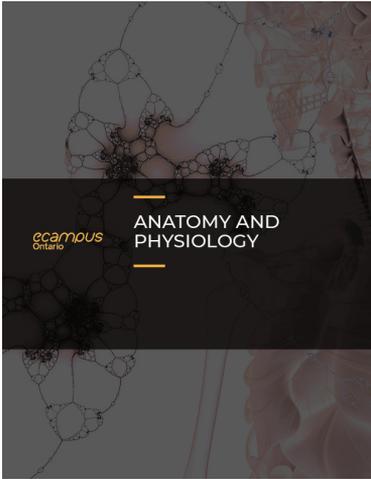

The 2nd edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Art and illustrations have been substantially improved, and the textbook features additional assessments and related resources.

Includes: instructor resources, slides, simulations, applications, summaries, exercises, and solutions.

Attribution: *Biology 2e* by Mary Ann Clark, Matthew Douglas, and Jung Choi is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Anatomy & Physiology: OpenStax

By: J. Gordon Betts, Tyler Junior College, Eddie Johnson, Central Oregon Community College, James A. Wise, Hampton University, Kelly A. Young, California State University, Long Beach, et al.

This text was a collaboration among many anatomy and physiology professors and was developed using pedagogical practices. This textbook has been successfully adopted, adapted, and has an average 4.9/5 professor rating.

Includes: instructor resources, case studies, student resources, simulations, exercises, solutions, and critical thinking questions.

Attribution: *Anatomy & Physiology: OpenStax* by J. Gordon Betts, Eddie Johnson, James A. Wise, Kelly A. Young et al. is licensed under a Creative Commons Attribution 4.0 International License, except where otherwise noted.

Biology I Biology II

These texts were developed through Lumen Learning to provide a solid biological foundation for non-science students.

Includes: instructor resources, student resources, applications, and summaries.

Biology for Majors I

Biology for Majors II

These texts were created through Lumen Learning to provide an expansive overview of introductory biology for science students. The broad and specific approaches within these texts provides academic freedom for instructors and provides the necessary information for students.

Includes: applications, instructor resources, exercises, assignments, and solutions.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Chemistry

Introductory Texts

Be Prepared! Everything you should know for 1st Year Chemistry

By: Andrew Vreugdenhil and Kelly Wright, Trent University

Be Prepared! Everything you should know for 1st year Chemistry

These online Pre-Chemistry modules are designed to function as chemistry preparation for first year chemistry students. They are particularly useful for students who, for various reasons, are otherwise not confident in their preparation for first year university level chemistry.

Attribution: *Be Prepared! Everything you should know for 1st Year Chemistry* by Andrew Vreugdenhil and Kelly Wright is licensed under a Creative Commons Attribution 4.0 International License.

Introductory Chemistry – First Canadian Edition

By: David W. Ball and Jessie A. Key, Vancouver Island University

This text is an adaptation of David W. Ball's Introductory Chemistry open textbook that was developed by a chemistry professor at Vancouver Island University as part of the B.C. Open Textbook Project. This text has been successfully adopted and includes over 20 additional sections.

Includes: instructor resources, exercises, solutions, examples, and summaries.

Attribution: *Introductory Chemistry – First Canadian Edition* by David W. Ball and Jessie A. Key is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Chemistry: Atoms First

This OpenStax textbook was developed with chemistry professors and a pedagogical approach, with Chemistry OpenStax as the

foundation. As the name suggests, this text uses an “atoms first” approach to the subject which involves the introduction of atomic and molecular structure at the beginning of the course material. This text has been successfully adopted.

Includes: instructor resources, exercises, solutions, simulations, and summaries.

Chemistry: OpenStax

This text was the precursor to the Atoms First book. This text covers the same concepts but through a different approach. This resource has been successfully adopted and adapted.

Includes: instructor resources, student resources, applications, summaries, exercises, and solutions.

Chemistry: The Central Science (Map)

This LibreText resource follows the published Chemistry: The Central Science textbook by Brown et al. but is under a Creative Commons license.

Includes: exercises, solutions, summaries, and simulations.

Chemistry LibreTexts

A collection of open textbooks, assignments, and other educational resources on chemistry subjects.

Includes: supplemental modules, exercises, ancillary materials.

The Basics of General, Organic, and Biological Chemistry

By: David W Ball, Cleveland State University; John W Hill, University of Wisconsin and Rhonda J Scott, Southern Adventist University

The Basics of General, Organic, and Biological Chemistry

This peer-reviewed open textbook was developed to suit a one-semester General, Organic and Biological Chemistry course.

Includes: Test questions following examples, end-of-chapter exercises.

Attribution: *The Basics of General, Organic, and Biological Chemistry* by David W. Ball, John W. Hill and Rhonda J. Scott is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Computer Science

Algorithms and Data Science

By: Jurg Nievergelt, Informatik and Klaus Hinrichs, Wilhelms University

This is a textbook for first year Computer Science. Algorithms and Data Structures With Applications to Graphics and Geometry.

Attribution: *Algorithms and Data Science* by Jurg Nievergelt and Klaus Hinrichs is licensed under a Creative Commons Attribution 4.0 International License.

Programming Fundamentals – A Modular Structured Approach using C++

By: Kenneth Leroy Busbee, Houston Community College

Programming Fundamentals - A Modular
Structured Approach using C++

By:
Kenneth Leroy Busbee

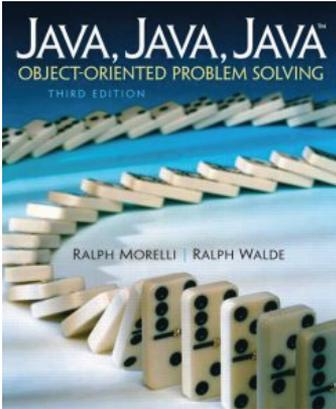

This reviewed open textbook covers content normally found in an introductory C++ programming course, including decisions, loops, functions, arrays and file I/O.

Includes: instructor and student resources.

Attribution: Programming Fundamentals – A Modular Structured Approach using C++ by Kenneth Leroy Busbee is licensed under a Creative Commons Attribution 4.0 International License.

Java, Java, Java: Object-Oriented Problem Solving

By: Ralph Morelli and Ralph Walde, Trinity College

The third edition of the Java, Java, Java textbook is suitable for a typical Introduction to Computer Science (CS1) course or for a slightly more advanced Java as a Second Language course using the “objects first” approach to programming and problem solving that was characteristic of the first two editions. Throughout the text we emphasize careful coverage of Java language features, introductory programming concepts, and object-oriented design principles.

Attribution: Java, Java, Java: Object Oriented Problem Solving by Ralph Morelli and Ralph Walde is licensed under a Creative Commons Attribution 4.0 International License.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Mathematics

Linear Algebra

Linear Algebra with Applications: Lyryx

By: W. Keith Nicholson

The first version of this textbook was published in 1986 as a traditional textbook. The current version from 2018 was published as an open educational resource for a traditional or advanced introduction to the topics within linear algebra.

Includes: instructor resources: solution manual to exercises and lecture slides.

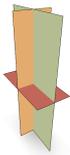

Attribution: *Linear Algebra with Applications: Lyryx* by W. Keith Nicholson is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Linear Algebra

By: Jim Hefferson, St. Michael's College, Vermont

LINEAR ALGEBRA

Jim Hefferson
Third edition

<http://joshua.smcvt.edu/linearalgebra>

This textbook, now in its fourth edition, has been positively reviewed by four math professors from American universities and the Mathematical Association of America.

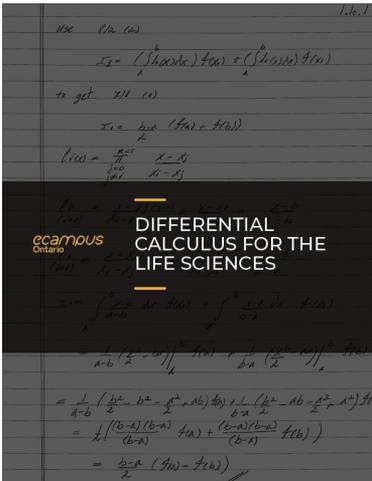

Includes: exercises, solutions, a lab manual, lecture slides, and includes applications of linear algebra.

Attribution: *Linear Algebra* by Jim Hefferson is licensed under the GNU Free Documentation License and a Creative Commons Attribution-ShareAlike 2.5 License.

Calculus for Life Sciences

Differential Calculus for the Life Sciences

By: Leah Edelstein-Keshet, University of British Columbia

This textbook was written by a math professor at the University of British Columbia and is currently used as a textbook for introductory calculus courses for life sciences undergraduates.

Includes: exercises and solutions to selected problems.

Attribution: *Differential Calculus for the Life Sciences* by Leah Edelstein-Keshet is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Calculus for the Life Sciences: A Modelling Approach Volume 1

By: James L. Cornette and Ralph A. Ackerman, Iowa State University

CALCULUS

For the Life Sciences: A Modeling Approach
Volume 1. Difference E's, Calculus, Differential E's

Growth of a mold colony. Chapters 1, 3, and 17

Light decrease. Chapters 1, 5, 17

Leaf Area. Chapter 11

CORNETTE AND ACKERMAN

This textbook was written by two professors at Iowa State University with the goal introducing students to scientific modeling. This course aims to teach students the necessary skills and concepts from a traditional physical sciences course, while explaining the applications of calculus to the life sciences.

Includes: exercises, solutions to select problems, and MATLAB exercises.

Attribution: *Calculus for the Life Sciences: A Modelling Approach Volume I* by James L. Cornette and Ralph A. Ackerman is licensed under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 International license.

Calculus

Calculus: OpenStax Volumes 1-3

Volume 1 concepts: functions, limits, derivatives, and integration

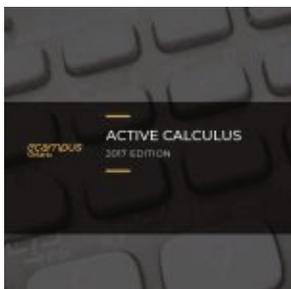

Volume 2 concepts: integration, differential equations, sequences and series, and parametric equations and polar coordinates

Volume 3 concepts: parametric equations and polar coordinates, vectors, functions of several variables, multiple integration, and second-order differential equations

Includes: Exercises and answers. Volume 1 has been faculty-reviewed, adopted, is accessible, and has ancillary resources. Volume 2 has been adopted, has ancillary resources, and is accessible. Volume 3 is accessible and has ancillary resources. Adopt and adapt these volumes at the links above on Volumes 1, 2, and 3, respectively.

Active Calculus Single Variable

By: Matthew R. Boelkins, David Austin and Steven Schlicker

Active Calculus is different from most existing calculus texts in at least the following ways: the text is freely readable online in HTML format and is also available for in PDF; in the electronic format, graphics are in full color and there are live links to java applets; there are live WebWoRK exercises in each chapter, which are fully interactive in the HTML format and included in print in the PDF; the text is open source, and interested users can gain access to the original source files on GitHub; the style of the text requires students to be active learners – there

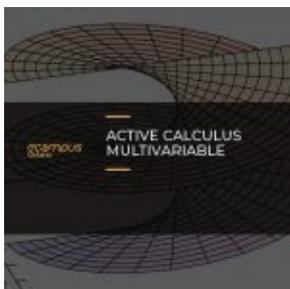

are very few worked examples in the text, with there instead being 3-4 activities per section that engage students in connecting ideas, solving problems, and developing understanding of key calculus concepts; each section begins with motivating questions, a brief introduction, and a preview activity, all of which are designed to be read and completed prior to class; following the WeBWoRk exercises in each section, there are several challenging problems that require students to connect key ideas and write to communicate their understanding

Includes: interactive exercises and solutions, a lab manual, and other instructor resources.

Attribution: *Active Calculus Single Variable* by Matthew R. Boelkins, David Austin and Steven Schlicker is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Active Calculus Multivariable

By: Matthew R. Boelkins, David Austin and Steven Schlicker

In *Active Calculus - Multivariable*, we endeavour to actively engage students in learning the subject through an activity-driven approach in which the vast majority of the examples are completed by students. Where many texts present a general theory of calculus followed by substantial collections of

worked examples, we instead pose problems or situations, consider possibilities, and then ask students to investigate and explore. Following key activities or examples, the presentation normally includes some overall perspective and a brief synopsis of general trends or properties, followed by formal statements of rules or theorems. While we often offer plausibility arguments for such results, rarely do we include formal proofs. It is not the intent of this text for the instructor or author to demonstrate to students that the ideas of calculus are coherent and true, but rather for students to encounter these ideas in a supportive, leading manner that enables them to begin to understand for themselves why calculus is both coherent and true

Includes: exercises and solutions.

Attribution: *Active Calculus Multivariable* by Matthew R. Boelkins, David Austin and Steven Schlicker is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

Community Calculus (Single, Multivariable)

This online compilation of four calculus textbooks is frequently updated and has been used in courses. It has been positively reviewed by the Mathematical Association of America. It also covers early and late transcendentals.

Includes: exercises, solutions, and WeBWorK problem sets.

APEX Calculus

This text, or portions of it, has been adopted at a considerable

number of American institutions to teach calculus, according to their website. These institutions include the Virginia Military Institute, where the author is an associate professor of mathematics.

Includes: interactive graphics, exercises and solutions.

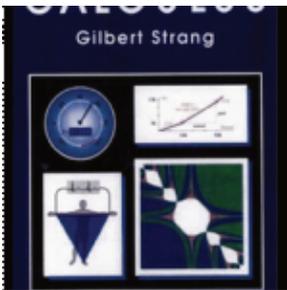

Contemporary Calculus

This textbook was created as part of the Washington State Colleges' Open Course Library Project, which received funding through the Gates Foundation. This text has been used by thousands of students within Washington State and was developed by a professor at Bellevue College.

Includes: exercises, solutions to odd-numbered problems, and other resources.

Calculus

By: Gilbert Strang

Originally published through traditional means, this textbook is now available as an open educational resource. This text includes single and multivariable calculus and

was written by a professor of mathematics at the Massachusetts Institute of Technology.

Includes: an instructor’s manual, a student study guide with exercises and select solutions, and links to a calculus video series by the author.

Attribution: *Calculus* by Gilbert Strang is licensed under Attribution-NonCommercial-ShareAlike

Statistics

Introductory Statistics: Saylor

By: Douglas S. Shafer and Zhiyi Zhang

This peer-reviewed resource introduces statistical concepts, including: descriptive statistics, basic concepts of probability, discrete random variables, continuous random variables, sampling distributions, estimation, testing

hypotheses, two-sample problems, correlation and regression, and chi-square and f-tests.

Includes: exercises and answers.

Attribution: *Introductory Statistics* by Douglas S. Shafer and Zhiyi Zhang is licensed under a Creative Commons Attribution Non-Commercial ShareAlike 4.0 International License.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

Molecular Science

Physics

University Physics Volumes 1-3

University Physics is a three-volume collection that meets the scope and sequence requirements for two- and three-semester calculus-based physics courses. It has been successfully adopted, was developed by professors of physics from American institutions and emphasizes the connection between application and theory.

By: Samuel J. Ling, Jeff Sanny and William Moebis

Volume 1 covers mechanics, sound, oscillations, and waves. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigour inherent in the subject. Frequent, strong examples focus on how to approach a problem, how to work with the equations, and how to check and generalize the result.

Attribution: *University Physics Volume 1* (OpenStax) by Samuel J. Ling, Jeff Sanny and William Moebis is licensed under a Creative Commons Attribution 4.0 International License.

Volume 2 covers thermodynamics, electricity and magnetism. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigour inherent in the subject. Frequent, strong examples focus on how to approach a problem, how to work with the equations, and how to check and generalize the result.

Attribution: *University Physics Volume 2* (OpenStax) by Samuel J. Ling, Jeff Sanny and William Moebis is licensed under a Creative Commons Attribution 4.0 International License.

Volume 3 covers optics and modern physics. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigour inherent in the subject. Frequent, strong examples focus on how to approach a

problem, how to work with the equations, and how to check and generalize the result.

Attribution: *University Physics Volume 3* (OpenStax) by Samuel J. Ling, Jeff Sanny and William Moebs is licensed under a Creative Commons Attribution 4.0 International License.

All volumes include: instructor resources, student resources, examples, exercises, solutions, summaries, and simulations.

Physics

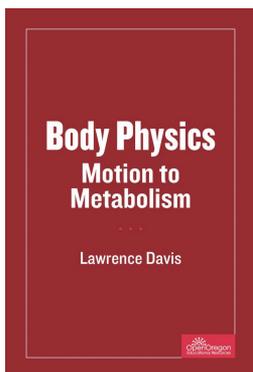

This Lumen Learning covers all of the concepts of first-year physics with a balance of application and theory.

Includes: problem-solving guides, examples, videos, applications, problems, selected solutions, and summaries.

Biophysics

Body Physics: Motion to Metabolism

By: Lawrence Davis

This text covers introductory biophysics concepts, including body forces, body heat, and body composition measurement.

Includes: summaries, exercises, solutions, applications, and examples.

Attribution: *Body Physics: Motion to Metabolism* by Lawrence Davis is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License, except where otherwise noted.

Astronomy

Astronomy: OpenStax

This astronomy text has been positively-reviewed and has been successfully adopted by other faculty. It covers introductory concepts in astronomy, from astronomical instruments to the evolution of galaxies.

Includes: instructor resources, student resources, applications, summaries, exercises, solutions, and group activities.

If you have questions about Open Educational Resources or other Open resources in your subject area, please contact your subject liaison librarian.

TED ROGERS SCHOOL OF MANAGEMENT

Accounting

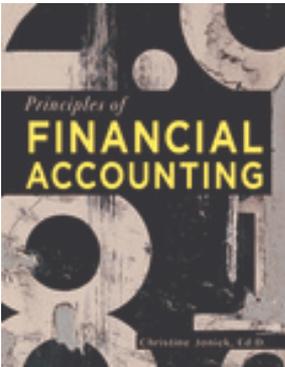

Financial Accounting

This text uses the Socratic method of delivery by structuring the chapters as a sequence of questions and answers to the questions.

Includes: exercises, examples, summaries, student resources.

Principles of Financial Accounting

By: Christine Jonick, *University of North Georgia*

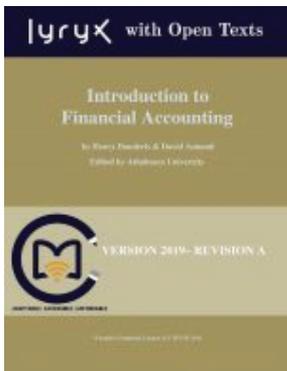

This textbook was developed by a professor of accounting at the University of North Georgia to “directly meet the needs of her students.” This text utilizes pedagogical approaches, has been successfully adopted, and has been peer reviewed by other accounting faculty.

Includes: student resources, professional development resources, exercises, solutions.

Attribution: *Principles of Financial Accounting* by Christine Jonick is licensed under a Creative Commons Attribution ShareAlike (CC BY-SA) 4.0 International License.

Introduction to Financial Accounting: International Financial Reporting Standards (Lyryx)

By: D. Annand and H. Dauderis, Athabasca University

This text is an adaptation of *Introduction to Financial Accounting* 3rd Edition that was developed through Lyryx Learning. Lyryx Learning specializes in open educational resources for math and economics. It has also been successfully adopted.

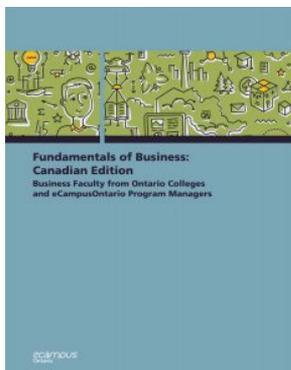

Includes: instructor resources, student resources, case studies, practice problems, solutions manual.

Attribution: *Introduction to Financial Accounting: International Financial Reporting Standards (Lyryx)* by D. Annand and H. Dauderis is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (BY-NC-SA) 4.0 International License.

Business Fundamentals

Fundamentals of Business: Canadian Edition

This textbook was developed by business faculty from Ontario Colleges and from eCampusOntario program managers. It incorporates introductory business topics, from ethics to marketing to entrepreneurship, in a Canadian context. It has received positive faculty reviews.

Includes: embedded quizzes with solutions, student resources, examples, summaries, applications.

Attribution: *Fundamentals of Business: Canadian Edition* is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (CC BY-NC-SA) 4.0 International License.

Introduction to Business

This OpenStax textbook was developed by a number of business

professors from various American institutions. It covers the contents of a traditional introductory business course.

Includes: instructor resources, student resources, applications, ethics activities, exercises, case studies, summaries.

Attribution: Introduction to Business is licensed under a Creative Commons Attribution (CC BY) 4.0 International License.

Introduction to Business

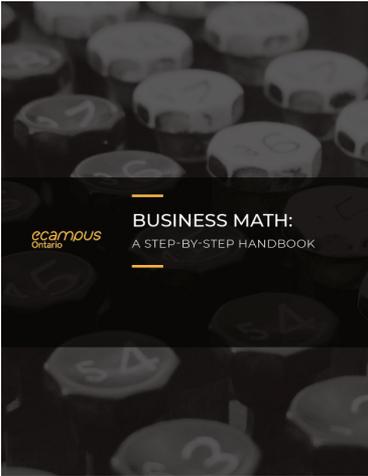

An open textbook developed by the State University of New York Open Textbook Project. It incorporates all of the concepts of a traditional introductory course.

Includes: instructor resources, student resources, case studies, applications, examples, exercises, solutions, summaries.

Attribution: Licensing information for *Introduction to Business* is listed at the end of each section and chapter.

Business Math: A Step-by-Step Handbook (Lyryx)

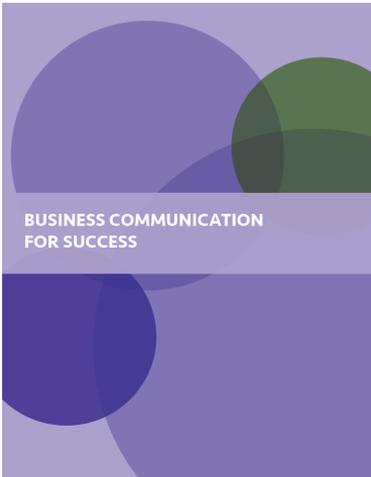

By: Jean-Paul Olivier

Business math is the study of mathematics required by the field of business. Business professionals will work with taxes, gross earnings, product prices, and currency exchange; they will be offered loans, lines of credit, mortgages, leases, savings bonds, and other financial tools.

Attribution: *Business Math: A Step-by-Step Handbook* (Lyryx) is licensed under a Creative Commons Attribution Non-Commercial ShareAlike (CC BY-NC-SA) 4.0 International License.

Business Communication for Success

Business Communication for Success (BCS) provides a comprehensive, integrated approach to the study and application of written and oral business communication to serve both student and professor.

Hospitality and Tourism Management

Human Resources in the Food Service and Hospitality Industry

Human Resources in the Food Service and Hospitality Industry

open.bccampus.ca

BCcampus  OpenEd

Human Resources in the Food Services and Hospitality Industry is one of a series of Culinary Arts open textbooks developed to support the training of students and apprentices in British Columbia's foodservice and hospitality industry. Although created with the Professional Cook, Baker and Meatcutter programs in mind, these have been designed as a modular series, and therefore can be used to support a wide variety of programs that offer training in foodservice skills.

Introduction to
Tourism and
Hospitality in BC Introduction to Tourism
and Hospitality in BC 

This textbook is an introduction to the tourism and hospitality industry in British Columbia, and is written with a first year college and university audience in mind. It is a collaborative work with input from educators, industry leaders, employers, and past graduates of BC's tourism and hospitality management programs. All chapters have been reviewed by experts in the field.

Each chapter is organized thematically moving from a global, then national and finally provincial context. Some chapters are quite global in focus while others concentrate primarily on British Columbia. Chapter content is based on available data and research, and input from collaborators.

Retail Management

Pop-up Retail Strategies in an Omnichannel

Context

By: Hong Yu, Sean Sedlezky, Ken Wong, Tony Hernandez, Pauline Larsen, and Gay Stephenson, Ryerson University

Pop-up Retail Strategies in an Omnichannel Context

2018 EDITION

Pop-up shops are temporary stores that “pop up” for a few days or months. They are a new form of retail operations that have gained popularity in the past decade. Retailers and brands of all sizes have implemented pop-up shops – from global and national retail chains, to small independent stores and even e-commerce pure players – that have positioned these initiatives as a marketing & communication tool, as incubators to test a market and/or new products, or as inventory liquidation venues. Pop-up shops have also been established as a solution for revitalizing communities where significant storefront vacancies exist.

This textbook includes 16 chapters, focused on 5 major areas:

- Pop-Up Retail Basics;
- Pop-Up Shops and Stakeholders;
- Practices and Strategies for Pop-Up Retailing – Primary Activities;
- Practices and Strategies for Pop-Up Retailing -Support Activities;
- Measuring Success of Pop-Up Retail Operations

Civil Law

OER Repositories

Here are some of the repositories used to discover the OER contained within this guide:

- eCampusOntario Open Textbook Library
Over 300 open textbooks in subjects including arts, business, health, recreation, science and social sciences.
- LibreTexts
Founded in 2008, LibreTexts is a leading, non-commercial open textbook organization for higher education. In Oct. 2018, the U.S. Dept. of Education awarded LibreTexts \$5 million over 3 years to expand its collection of primary source textbooks and supplemental learning resources.
- Lyryx Learning
Open textbooks for math and economics; license fees for accompanying online assessments. Print-on-demand available for purchase.
- Mason OER Metafinder
A meta-search tool that simultaneously searches several large OER repositories of open educational materials.
- MERLOT
Peer-reviewed free learning materials, exercises and webpages, and open textbooks.
- OASIS (Openly Available Sources Integrated Search)
A search tool for discovery of open content from 97 different sources.
- OER Commons
A large OER repository, including textbooks. A product of the

Institute for the Study of Knowledge Management in Education.

- OpenStax
Peer-reviewed texts in science, math, social sciences. Supported by additional learning resources. Print copies available via Amazon.
- OpenSUNY
Open textbooks in a variety of disciplines.
- Open Textbook Library
A resource for peer-reviewed academic textbooks that are free, openly licensed, and complete.
- WikiBooks
Open Textbook project with over 3100 titles.
